Our ref.: USM&M02

Dear Sir(s) / Madam(s),

The Cape Town branch of GEA Africa is looking for a Mechanical Engineering student for an internship position.

The ideal candidate must have graduated in December 2021 or April 2022.

**Job description:**

Your primary role will be to support on primary and mostly secondary projects that is aimed at improving engineering processes, documentation, efficiency, and standardization within our department.

We have a project management, CAD and engineering team and from time to time you will also be working alongside them assisting on active projects out in the field where you will be exposed to large scale industrial refrigeration plants.

The position will be on a contract basis.

**Start date:**

Immediately.

**End date:**

No contract end date at this stage. Depending on our potential, planned, project intake.

There is always an opportunity for permanent employment - should you meet the requirements and provided there are an available position.

**GEA Africa (Pty) Ltd**

**Preferably strong in the following knowledge area:**

Thermodynamics, specifically in the refrigeration area of study  
Fluid dynamics

**Preferable skills:**

AutoCAD, Inventor

Intermediate to Advance Microsoft Excel skills

Please contact the undersigned at [Andre.vanderMerwe@gea.com](mailto:Andre.vanderMerwe@gea.com) with a copy of your Curriculum Vitae.

Yours Faithfully,

André van der Merwe
