

Job opportunity at Qfinsoft (Pty) Ltd

Job Title:	FEA and CFD Applications Engineer
Applications close:	15 October 2022

Overview

Qfinsoft is the leading supplier of ANSYS (FEA, CFD and EMag software) and Rocky (DEM software) in Southern Africa. Qfinsoft is looking for a young, self-motivated engineer to join their team of engineers as an FEA and CFD applications engineer.

Job Functions

- Technical support to existing clients on CAE software usage.
- Training existing and prospective clients on CAE software.
- Pre-sales support in the form of preparing and presenting software demos to prospective clients.
- CAE consulting work ranging from project proposal writing, performing the work and presenting the results to the client.

Requirements

- Bachelor's Degree in Mechanical Engineering.
- 1-2 years relevant experience.
- Excellent presentation skills.
- Ability to work independently, as well as within a team.
- Ability to learn and problem solve independently.
- Own vehicle for customer visits.
- Experience in high-end FEA and CFD. (Non-linear FEA and ANSYS product experience will be considered an advantage.)

Please send your CV to Danie de Kock (danie@qfinsoft.co.za).
