

PAARL

MECHANICAL DESIGN ENGINEER

Qualipak (Pty) Ltd manufactures equipment for the food and beverage industries and requires a dynamic individual to join their Design team.

Responsibilities include:

- lay-out drawings of customers' manufacturing areas
- produce efficient designs within the framework of simplicity, feasibility, cost efficiency, and accuracy
- compile assemblies and detailed manufacturing drawings in accordance with acknowledged manufacturing standards
- compile part specifications, BOM, production orders and manuals
- issue revisions and update manufacturing drawings, material lists and machine manuals
- on-site measurements
- design and project administration
- provide technical support during manufacturing processes and for technicians on-site

Skills required:

- in the process of completing (or having completed) a degree in Mechanical Engineering
- computer literacy (Autocad and Solidworks (2D & 3D) will be an advantage)
- deadline conscious and able to plan workload accordingly
- attention to detail
- strong problem-solving skills
- ability to work independently as well as function within a team
- a positive attitude, self-motivated and reliable

The remuneration package will be in accordance with the job's responsibilities.
