MECHANICAL OR ELECTRICAL ENGINEER-IN-TRAINING

IHC South Africa (Pty) Ltd (IHC SA), a subsidiary of the Mining division of Dutch based Royal IHC, is currently seeking to secure the services of a graduate Mechanical or Electrical Engineer to be part of the Junior Engineer Development Program for a period of 1-year. As part of the program, the graduate will rotate through the various departments of the company, while working on the companies' ongoing projects. This will give the graduate engineer a broad-based exposure to the various functions of IHC SA as well as providing a solid background in design and project-based experience.

Overview and responsibilities

As the engineer-in-training, you will rotate through the three engineering departments of the company, Projects, Products and Services, with exposure to the Sales and Finance teams. The goal will be to assist and gain experience in each of the departments and by the end of the year, have a holistic view of how the different departments of the company operate.

The Projects team is responsible for the design and fabrication of equipment. You will be involved in the full life cycle of the project, assisting in proposals, conceptual design, detail design, and fabrication of components.

The Products team is responsible for the development, sales and support of the standard range of IHC SA equipment. You will assist in the further development or optimisation of these products, and in supporting the sales and fabrication of the products.

The Services team is responsible for supporting the current clients of Royal IHC in the Southern Africa region, and in supporting the Projects and Products team in the fabrication of equipment.

To successfully apply for this position, the graduate engineer should be self-motivated, innovative, have high attention to detail and be a sound thinker. Familiarity with CAD draughting is required with good computer literacy, and have a good understanding of Engineering Principles.

Qualifications & Competencies

- Be graduating for a Bachelor of Science Degree in Mechanical or Electrical Engineering at the end of 2022;
- Excellent command of the English language with good verbal and written communication skills;
- Attention to detail and a commitment to technical excellence;
- Self-motivated, organized and results driven;
- Ability to work independently as well as in a team;
- Computer literate; and
- Own transportation.

What Do We Offer

IHC SA offers you a challenging position within a dynamic and innovative organization, characterised as being open and informal. The organisation is currently expanding locally and in a process of change in which collaboration and quality awareness are key words. You will be working in a stimulating environment with engineers and other technical staff. The company offers a 1-year engineer in training contract at a competitive salary package.

Applications

Please send your CV to the Technical Manager: Alan Newington, at a.newington@royalihc.com.
