MEGANIESE ONTWERPSINGENIEUR POS BESKIKBAAR

Agrico is 'n vooruitstrewende vervaardiger en verskaffer in die landbousektor in suidelike Afrika. Ons het 'n opwindende geleentheid vir 'n meganiese ingenieur om by ons span aan te sluit by ons hoofkantoor in Bellville, Kaapstad. Die suksesvolle kandidaat sal betrokke wees by die ontwerp, vervaardiging en implementering van besproeiingstelsels, implemente en 'n verskeidenheid ander produkte vir die landbousektor.

Voordelige kwalifikasies, vaardighede en ervaring:

- Baccalaureus graad in meganiese ingenieurswese
- Bekwaam in Afrikaans en Engels
- Gewillig en in staat om tyd op die fabrieksvloer en in die veld te spandeer om prototipes te bou en toets, ontwerpe in produksie te kry en stelsels te implementeer
- Goeie mensevaardighede om direk met klante en tegniese personeel in die veld te skakel
- Ervaring in meganiese ontwerp en vervaardiging van produkte
- Ervaring met Autodesk Inventor / Fusion / Vault / AutoCAD
- Ervaring met CAM en/of gewone CNC programmering
- Ervaring in projekbestuur
- Ervaring met plaat metaal
- Ervaring in die ontwerp van onderdele en vorms vir inspuitsvorming
- Passievol oor landbou.

Verantwoordelikhede en markverwante salaris hang af van die kandidaat se kwalifikasies en ervaring.

Stuur asb. CV, matrieksertifikaat en volledige akademiese rekord na job135@agrigo.co.za om aansoek te doen.

MECHANICAL DESIGN ENGINEER POSITION

Agrico is a leading producer and distributor of agricultural equipment in Southern Africa. We have an exciting opportunity for a mechanical engineer to join the team at our head office in Bellville, Cape Town. The successful candidate will be involved in the design, manufacture and bringing to market of irrigation systems, implements and a variety of other products.

Required and recommended qualifications, knowledge and experience:

- Bachelor's degree in mechanical engineering
- Fluent in both Afrikaans and English
- Willing and able to spend time on the factory floor and field to build and test prototypes, get designs into production and implement systems.
- Good people skills to engage directly with customers and technicians
- Experience in mechanical design and manufacturing of products
- Experience with Autodesk Inventor / Fusion / Vault / AutoCAD
- Experience with CAM and/or manual CNC programming
- Experience in project management
- Experience working with sheet metal and steel
- Experience in the design of injection moulded plastic parts and injection moulds.
- A passion for the agricultural industry

Duties and market related salary dependent on candidate qualifications and experience.

Please send CV, matric certificate and full academic record to job135@agrigo.co.za to apply.
