

Position: Junior engineer (Mechanical or Mechatronic)

Introduction

Join our innovative team at a well-established FMCG manufacturing company situated in Parow Industria, Cape Town. Manufacturing health care and food packaging products, we are committed to pushing the boundaries of engineering excellence at our 24/7 manufacturing facility. We are currently seeking a **newly qualified engineer** to join our dynamic team in **January 2025**. The ideal candidate will have a bachelor's degree in **mechanical or mechatronic engineering**.

Duties & Responsibilities

- Collaborate with senior engineers to develop and implement mechanical designs for new projects or product enhancements.
- Conduct preventive maintenance activities to ensure the reliability and longevity of equipment and production lines.
- Perform process fault finding to identify and troubleshoot manufacturing processes.
- Propose and implement process improvement initiatives to enhance efficiency and productivity. Prepare technical documentation, including drawings, specifications, and reports.
- Work closely with cross-functional teams to achieve project goals and objectives.

Desired Experience & Qualification

- Bachelor's degree in **mechanical engineering** or **mechatronic engineering**.
- Strong understanding of mechanical engineering principles and practices.
- Ability to analyse and solve complex technical problems.
- Effective communication skills and the ability to work well in a team environment. Ability to effectively communicate with a diverse range of coworkers on the many different levels found in a production environment.
- Eagerness to learn and adapt to new challenges and technologies.

Benefits

- Salary that is market related for applicant's qualification.
- Opportunities for professional growth in a collaborative and supportive work environment.
- Exposure to cutting-edge technology and engineering projects
