

Complexity made simple

BI Analyst

Summary

We are looking for a detail-oriented Business Intelligence (BI) Analyst to join our fast-growing startup company in the agriculture industry. The BI Analyst will be responsible for analyzing large datasets, developing reports, and delivering insights to support data-driven decision-making for internal teams and clients. You will be part of a cross-functional team of engineers, business stakeholders, and data scientists, working together to deliver innovative products and services.

Responsibilities

- Extract, clean, and analyze large datasets from multiple sources to generate actionable insights.
- Design, develop, and maintain dashboards and reports using BI tools (e.g., Power BI) to provide stakeholders with clear and concise information.
- Analyze data to identify trends, inefficiencies, and opportunities for optimization in operations.
- Work closely with cross-functional teams to understand their data needs and develop solutions.
- Provide data-driven recommendations to improve operational processes and optimize supply chain efficiency.
- Ensure the accuracy and consistency of data across all reporting and analysis activities.

Requirements

- Bachelor's degree in Data Science, Business Analytics, Engineering, or a related field.
- Experience in a BI Analyst or similar role is a plus.
- Strong proficiency in BI tools and data analysis tools (e.g., SQL, Excel, Power BI).
- Excellent analytical and problem-solving skills.
- Ability to communicate complex data insights clearly to non-technical stakeholders.
- Excellent communication and teamwork skills.
- Familiarity with supply chain and processes is a bonus.
- Eagerness to learn and adapt in a fast-paced startup environment.
