1 Vacancy Details

Employer: [Broadreach Energy](http://www.broadreach.energy)

Due to the growth currently experienced by our company, Broadreach Energy is expanding its technical team. We are looking to appoint a Renewable Energy Technician to add to our established and diverse pool of skills. The success of our business development team means we particularly need to add capacity to manage the contracting, construction and operation of successfully concluded projects.

The successful candidate will have proven technical skills and experience in construction and plant operations. They will assist the existing team in implementing and operating projects for our clients, and fault finding when issues arise.

2 Required Skills

- Autocad: 1 year or less
- Site Supervisor: 2 to 3 years
- Artisan/Technician (N6 National Certificate/National Diploma) In Electrical Engineering.: 3 to 4 years
- Installation Electrician Or Master Electrician Qualifications: 1 to 2 years
- MV Switching Qualifications (ORHVS) Will Be Advantageous : 1 year or less
- Helioscope Or Open Solar Knowledge : 1 year or less

3 Candidate Requirements

Behavioural Competencies

- Strong people and communication skills, to be able to communicate technical information to contractors and clients in a simple manner.
- Problem solving capability and be able to perform faultfinding
- Must be able to read and interpret electrical design drawings
- Trouble shooting skills
- Must have a passion for the renewable energy industry
- Must be organized and able to organize others.
- The ability to work on one's own to meet deadlines in concluding projects timeously.
- Motivated and driven by goals.
- Ability to "learn on the job" – the successful candidate is not expected to be experienced in our field, but will have the opportunity to upskill themselves through hands-on experience.
- Being comfortable with travel and working on your own in tough environment is a must.

Areas of responsibilities

- Maintaining solar and battery power plants for C&I customers in Sub-Saharan Africa
- Repairing equipment in the field
- Creating maintenance and repair plans
- Keeping records of maintenance
- Engaging with suppliers and OEMs

Should you not receive feedback within 10 days of submission, please consider your application unsuccessful
